

Welcome to BTSValidation.com

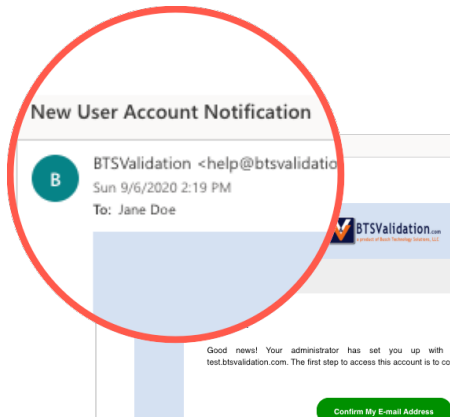

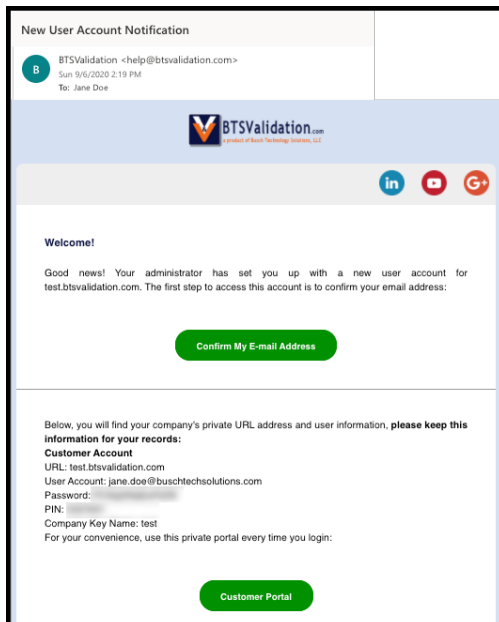

BTSValidation is software testing system that focus on automating formal testing. This system can be used for all types of testing; from advanced formal testing to basic ad hoc testing.

Prerequisite

- BTSValidation.com works with **Google Chrome** and **Mozilla Firefox**. BTSValidation doesn't work with Internet Explorer.

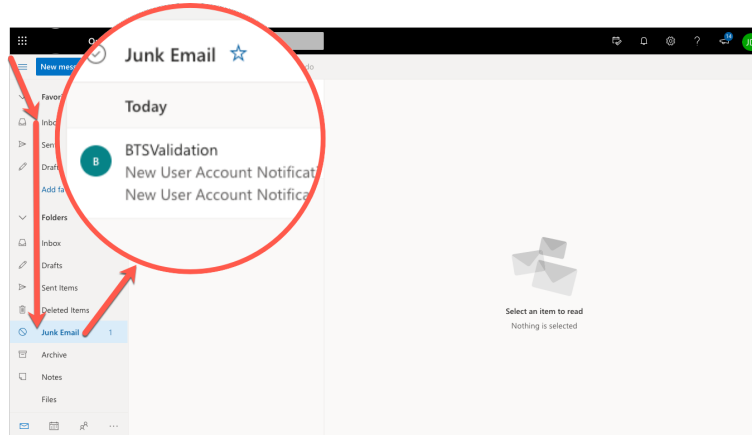

Active your account:

1. One should receive a “New User Account Notification” email from BTSValidation.

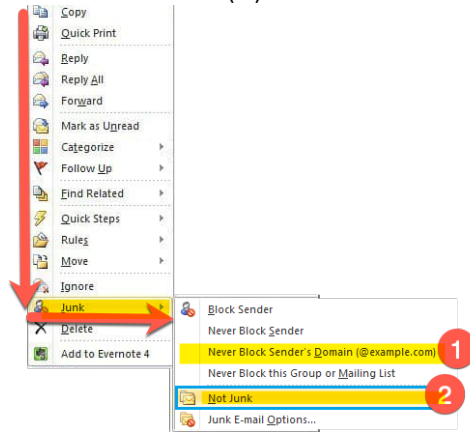

2. The email might be in your “Inbox” or your “Junk Mail”

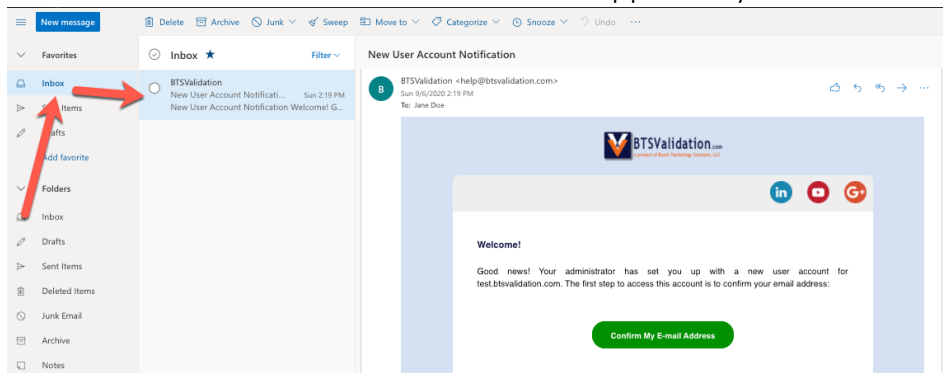

- a. If the email is in your “Junk Mail”, locate the email from BTSValidation.

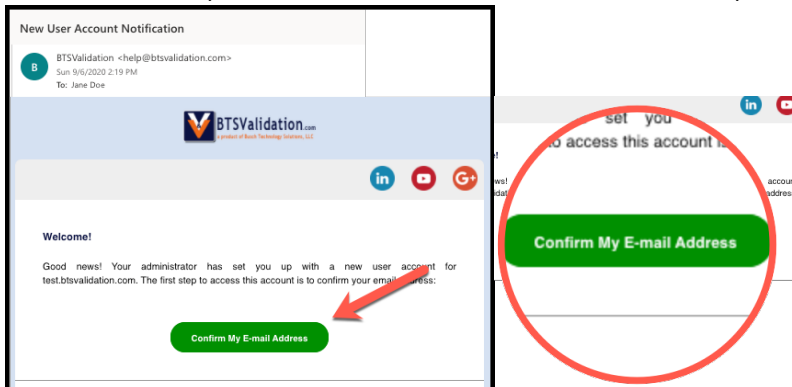

- b. Right-click on the email and select both “Never block Sender’s Domain” (1) and “Not Junk” (2).

- c. The email from BTSValidation should now appear in your Inbox.

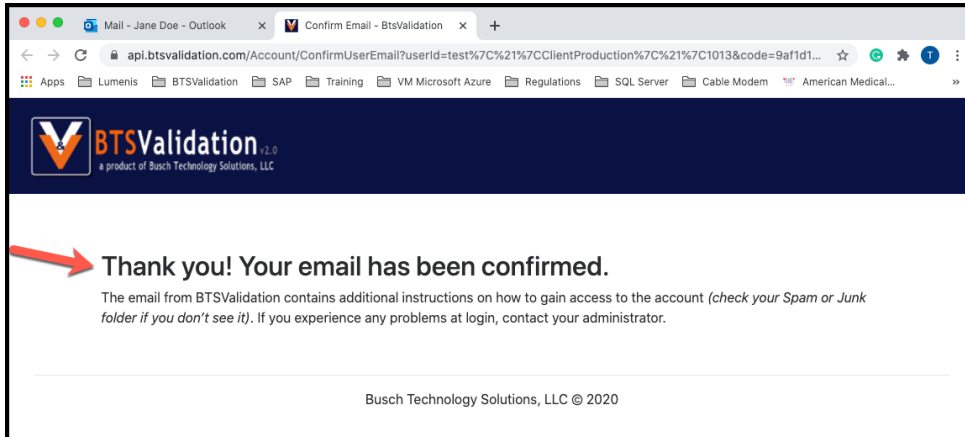

3. Inside the body of the email click on the “Confirm My Email Address” button.

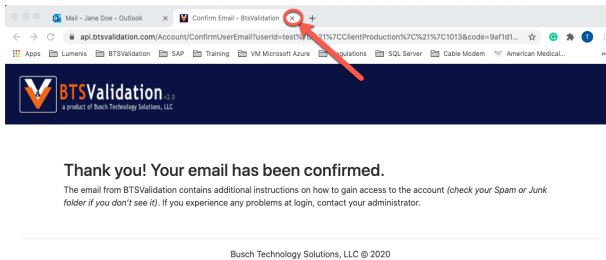

4. A new browser window will open acknowledging the confirmation of the account.

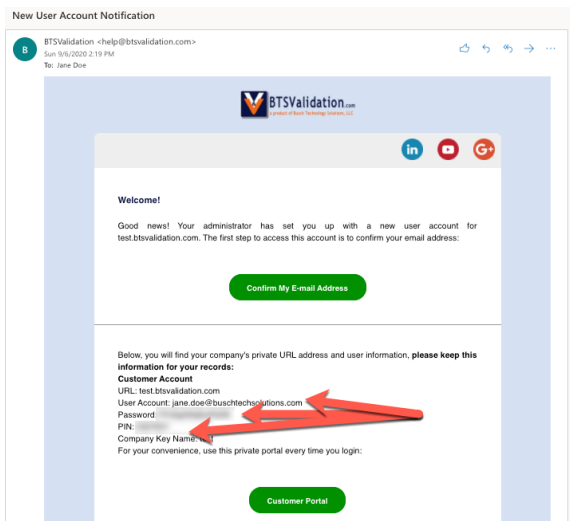

5. Close the confirmation window.

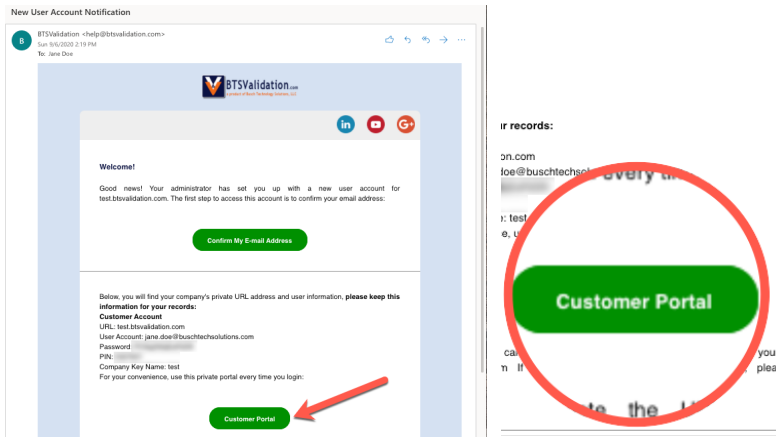

6. Go to the body of the email and note:

- Your username
- Your password
- Your PIN

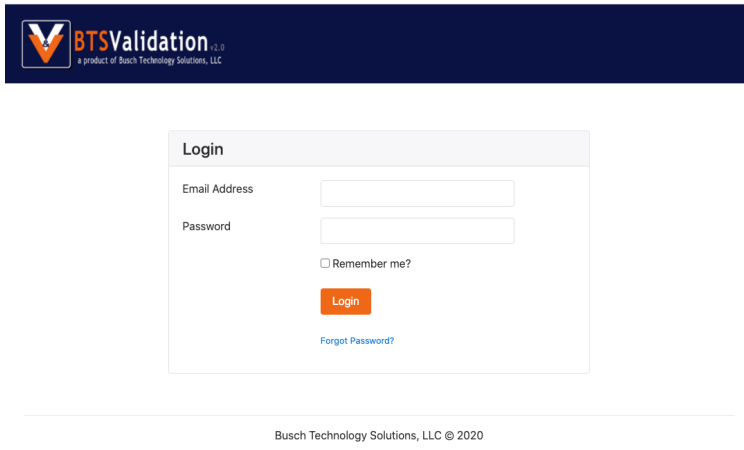

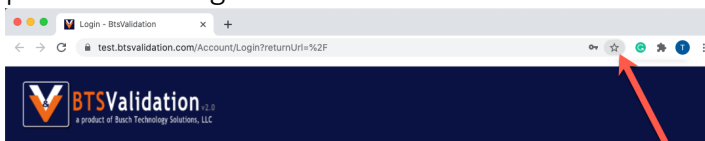

7. Click on the “Customer Portal” button.

8. A new browser window will open to your company’s instance of BTSValidation.

9. Bookmark the URL for easy future access. Enter your email address and assigned password to login.

10. Congratulations on your first login! For security reasons you will be asked to change your password the first time you login. Make sure to remember your new password for future secured logins.
